NorthWest Short Line is the world's premier maker of wheelsets, gearboxes, replacement motors, tools, and other products for the advanced railroad modeler. NWSL offers the widest selection of high quality model railroad upgrade and repair products since 1959.

69-4 THE CHOPPER II \$44.95

No sloppy, "fits all", cuts any angle (whether it maintains the angle you want or not) complexity. Use the precision mitre guides to assure accurate angle and repeatability.

Retains the high precision, extremely sharp, inexpensive single edge razor blade as the cutting tool to assure economy, clean cuts from a blade you can find when you need it—at most drug, hardware or paint stores—and can afford to replace as often as necessary for clean, sharp cuts every time. Increase your precision and model making efficiency.

- *Fits your workspace—only 7"x 7"*
- *Replaceable cutting mat for cleaner cuts*
- *Cuts all model building woods, plastics*
- *Precision guides for common angles 30, 45, 60 degrees.*
- *Safer, with more accurate repeatability. Rigid handle mount system assures greater accuracy, repeatability of cuts and more safety—no loose handle that can slip or flip into unsafe position exposing cutting blade.*
- *Cutting depth of 1/4" maximum*
- *Diecast aluminum frame, light (under 2 lb.) and strong*
- *Right-hand or Left-hand opera*

Replacement parts (69-4)

6910-4	1.95	90-30 Angle stop guide, metal	4915-4	1.50	Single edge razor blades (8)
